Chisel Reviewer Guide

A feature-by-feature walk through the desktop app, with room for your notes.

Reviewer	
Date(s) tested	
App version	0.5.0 + unreleased (commit 3d4c31d)
Computer / operating system	
Project used for testing	
AI set up? (OpenRouter key / local model)	
Models chosen (writing / chat / image)	

HOW TO USE THIS GUIDE

1. **Work on a copy of a project**, or on the bundled example `examples/residual`. Several steps rename, move and delete things.
2. Tick the box beside each step you tried. The grey text says what should happen.
3. At the end of each section, fill in three ratings. **Function**: Works, Rough (works but awkward), Broken, or Skipped. **Feel**: 1 (frustrating) to 5 (a pleasure). **Matters to me**: how much you would miss the feature.
4. Under **What happened**, write bugs and surprises: exact error wording helps, and note the time if something crashes. Under **How it felt**, write your impressions and what you would change.
5. You do not need to do every step or every section. Follow your curiosity; tick what you tried.
6. When you are done, copy the ratings onto the scorecard on the last page.
7. Sections 16 to 21 need AI set up (section 15). Image generation costs about $0.03 a picture.

Before you start

Desktop app shortcuts (Cmd instead of Ctrl on a Mac).

`Ctrl K`	Quick switcher (jump to any scene or note)
`Ctrl N`	New scene
`Ctrl J`	Open the note for the name under the cursor; with a name selected, make one
`Ctrl G`	AI write: draft at cursor, expand a marker, or rewrite the selection
`F7` / `F8`	Accept / reject the AI draft under the cursor
`Ctrl .`	Spelling fixes for the word under the cursor
`Ctrl S`	Save now (it also autosaves)
`F11`	Focus mode

ANYTHING TO KNOW BEFORE TESTING (SETUP NOTES, PROBLEMS GETTING STARTED)

Launching and projects

1

First impressions: getting into a project and moving around the window.

- [ ] Start Chisel. A launch screen lists recent projects, with Open folder and New project.
- [ ] Make a new project. Default location is your novels folder; it opens with a first scene.
- [ ] Open an existing project with Open folder, then reopen it from the recent list.
- [ ] Switch between two projects. Each opens where you left it; nothing from one leaks into the other.
- [ ] Drag the window by its top bar; minimise, maximise, restore and close it.
- [ ] Close and restart Chisel. Your last project and scene come back.
- [ ] Resize the window narrow and wide. Panels stay usable; nothing jitters or overlaps.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Binder, scenes and parts 2

The left-hand binder: the book's structure.

- [ ] Make a scene with `Ctrl N` and another from the binder's new-item button.
- [ ] Rename a scene. The title updates in the binder, breadcrumb and window title.
- [ ] Make a part (chapter folder), rename it, and move scenes into it.
- [ ] Drag scenes to reorder them, inside a part and between parts. Numbering follows; the open scene stays open.
- [ ] Move a whole part up or down.
- [ ] Park a scene (take it out of the book without deleting it). A Parked scenes group appears; word totals drop.
- [ ] Put the parked scene back into the book.
- [ ] Try the Corkboard and Outline views; reorder by dragging there too.
- [ ] Use `Ctrl K` to jump to a scene by typing part of its name.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Writing in the editor 3

The heart of the app. Write a few real paragraphs.

- [ ] Type several paragraphs. The status bar shows Saved shortly after you stop.
- [ ] Bold and italic from the toolbar and from `Ctrl B` / `Ctrl I`.
- [ ] Undo and redo, from the toolbar and the keyboard.
- [ ] Watch the word count for the scene, the project, and today.
- [ ] Paste text from another program. It lands as plain text, without odd formatting.
- [ ] Focus mode with `F11`, then leave it.
- [ ] Open the scene file in another editor, change a line, come back. Chisel notices; it never silently overwrites your change.
- [ ] Long scene: scroll, select across paragraphs, check that typing stays smooth.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped

Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Characters, places and links 4

The living story bible: names in the prose connect to notes.

- [ ] Select a character's name in a scene and press `Ctrl J` to make a note. Try a place too.
- [ ] Every later mention of the name is coloured, without brackets. Aliases count as mentions too.
- [ ] Hover over a name. A small card shows the note's summary.
- [ ] Click a name. The Notes tab on the right shows that note. (This used to blank the screen; it is fixed.)
- [ ] Ctrl-click a name. The note opens in the editor.
- [ ] Type `[[Someone New]]` for a name with no note. It is marked as missing; the Notes tab offers Create note.
- [ ] Click a backlink in the Notes tab. The scene opens at that line.
- [ ] Open a character from the binder's Characters group.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

The character sheet

5

The Notes tab for one character: aliases, birth, backlinks.

- [ ] Add an alias in the Add alias box and press Enter. The alias becomes a mention in the prose.
- [ ] Enter a birth year in Born (e.g. `2187` or `2187-03-14`). With story time on scenes, the age in this scene appears.
- [ ] Enter nonsense in Born. "Not a story time. Kept as text." Nothing is lost.
- [ ] Open in editor, write a description in the body, return to a scene. The Notes tab shows the new text.
- [ ] Look at the note as it opens in the editor. Is the name / type / aliases block at the top clear, or confusing?
- [ ] A note with no body text at all. Shows "This note has no text yet."

Function	○ Works ○ Rough ○ Broken ○ Skipped
Feel	○ 1 ○ 2 ○ 3 ○ 4 ○ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	○ Must have ○ Nice to have ○ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Relationships (new) 6

Who is whose sister, rival, boss. Written in the note; the other side is worked out for you.

- [ ] In a character's note, add a section `## Relationships` with a line `- [[Other Name]] — older sister`.
- [ ] Check the Relationships list in that character's Notes tab.
- [ ] Open the other character. The relationship appears there, marked "from their note". Their file is not changed.
- [ ] Link to someone with no note yet. Listed with "no note yet"; no note is created.
- [ ] (AI) Press Suggest relationships. A review list appears; nothing is saved until you accept rows.
- [ ] Accept some suggestions, reject others. Only the accepted ones are written into the note.
- [ ] Are the suggested labels sensible for your story?

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Rename everywhere 7

Change a character's name across the whole book, safely.

- [ ] From the Notes tab, choose Rename everywhere. A preview lists every place the name appears.
- [ ] Untick a few occurrences, then apply. Only the ticked ones change.
- [ ] Check the prose, the note's file name and the binder.
- [ ] Undo the rename. Everything goes back as it was.
- [ ] Edit a scene between preview and apply. Chisel refuses to overwrite the changed file and says so.

Function	○ Works ○ Rough ○ Broken ○ Skipped
Feel	○ 1 ○ 2 ○ 3 ○ 4 ○ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	○ Must have ○ Nice to have ○ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Scene details and story time 8

The inspector strip under the editor: status, point of view, place, purpose, and when it happens.

- [ ] Set a status, POV character, place and chapter purpose for a scene.
- [ ] Set a word target and watch progress toward it.
- [ ] Set a story time (when it happens) on one scene, e.g. `2190-06`. Later scenes without one inherit it.
- [ ] Enter an invalid story time. Flagged, kept as text, never guessed.
- [ ] Check character ages in a scene with a story time (needs Born, section 5).
- [ ] The details never appear as text in the prose, the word count, or exports.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Spell check

9

Spelling only, offline. Never grammar.

- [ ] Misspell a few words. They are underlined after a moment; the count shows in the status bar.
- [ ] Put the cursor on one and press `Ctrl .` (or click it). Pick a suggestion.
- [ ] Add a made-up word to the dictionary. It stops being flagged everywhere.
- [ ] Character and place names are never flagged.
- [ ] Open Dictionary in the binder. A plain list of your accepted words you can edit.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Comments 10

Margin notes on passages, kept beside the scene and never in the prose.

- [ ] Select a passage and use the comment button above the page. Write a comment.
- [ ] A marker appears in the margin; click it to read the comment.
- [ ] Edit the text around the passage. The comment stays attached; if its text is deleted, it is kept as detached, not lost.
- [ ] Move or rename the scene. Comments travel with it.
- [ ] Delete a comment.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Collections

11

Tag scenes into groups like "Needs continuity pass" or "Mara's arc".

- [ ] Make a collection from the Collections panel (bottom left).
- [ ] Add several scenes to it; view the collection's scene list.
- [ ] Change its colour; rename it. The scenes keep their membership.
- [ ] Delete the collection. Scenes are untouched apart from the tag.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Snapshots

12

Saved versions of a scene you can compare and restore.

- [ ] Take a snapshot of a scene, with a label.
- [ ] Change the scene a lot, then compare it with the snapshot. A word-by-word comparison.
- [ ] Restore the snapshot. A snapshot of the current text is taken first, so nothing is lost.
- [ ] Check that a daily automatic snapshot exists after a day of writing.
- [ ] Start a new draft (Draft 1 to Draft 2) from the status bar, if you want to try it.

Function	○ Works ○ Rough ○ Broken ○ Skipped
Feel	○ 1 ○ 2 ○ 3 ○ 4 ○ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	○ Must have ○ Nice to have ○ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Notebook

Research and loose notes, separate from the book and the story bible.

- [ ] Make a notebook note with + New note; try a template.
- [ ] Make a note from a web address (from URL).
- [ ] Select prose in a scene and send it to the notebook.
- [ ] Search the notebook for a word.
- [ ] Delete a notebook note. It goes to the Trash.
- [ ] Notebook notes are not counted as book words and not spell-checked.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Git sync (optional) 14

Only if git is installed. Nothing happens unless you click.

- [ ] Check the Sync item in the status bar. Without git it is hidden or says so.
- [ ] Initialise a repository for the project.
- [ ] Commit with a message.
- [ ] Push. It asks first and names the remote. It never forces.

Function	○ Works ○ Rough ○ Broken ○ Skipped
Feel	○ 1 ○ 2 ○ 3 ○ 4 ○ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	○ Must have ○ Nice to have ○ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Settings and AI setup 15

Everything except the AI features works without this.

- [ ] Open Settings (gear, bottom left). Look through every section.
- [ ] Enter an OpenRouter key. Stored in the system keyring, not in the project.
- [ ] Pick models for each role (writing, chat, checks, image). The picker lists real models with prices.
- [ ] (Optional) Local model: with Ollama running, switch the picker to local models and choose one.
- [ ] Run any AI action. The AI cost in the status bar goes up.
- [ ] Start an AI request and press Stop. Nothing is inserted or saved.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Assistant chat

16

The right-hand Assistant tab. It suggests; it never edits your text.

- [ ] Ask a question about the open scene. The About: chip shows what it is looking at.
- [ ] Open a character, then ask about them. The chip changes to that character.
- [ ] Remove the About chip and ask again. The answer no longer uses that item.
- [ ] Switch scope between the current scene and the whole project.
- [ ] Attach a scene, a note and a comment with the paperclip.
- [ ] Open "What was sent" under a reply. Lists what was included, trimmed or left out.
- [ ] Regenerate a reply; delete one; start a new chat; reopen an old chat from history; rename it.
- [ ] Save a useful reply to your notebook.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Brainstorm and Ask my notebook

17

Idea generation, and questions answered only from your own notes.

- [ ] Brainstorm ideas for what happens next. A list of ideas as a chat message.
- [ ] Are the ideas specific to your story, or generic?
- [ ] Ask my notebook a question your notes can answer. The answer cites your notes.
- [ ] Ask it with an empty notebook. A clear refusal, with no AI charge.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Alias finder, continuity, story bible

AI reading your scene against your notes. Every result is reviewed before anything changes.

- [ ] Find aliases in a scene. Suggestions like "the old smith" for a known character; accept some.
- [ ] Run a continuity check on a scene that contradicts a note (wrong eye colour, wrong town).
- [ ] Review an issue; dismiss (waive) one; restore a waived one.
- [ ] Update the story bible from a scene. Proposed note changes, each accepted or rejected.
- [ ] Were the flagged issues real? Any false alarms or misses?

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Style guide and AI writing

The AI learns your voice, then drafts. Drafts are marked until you accept them.

- [ ] Open Style Guide in the binder; learn the style from your prose. Edit the result.
- [ ] Put the cursor in a scene and press `Ctrl G` to draft. The new text is marked as a pending draft.
- [ ] Write `{{expand: they argue about the money}}` and press `Ctrl G` on it.
- [ ] Select a paragraph and press `Ctrl G` to rewrite it.
- [ ] Accept one draft with `F7` and reject another with `F8`. Rejecting brings back your original exactly.
- [ ] Does the drafted prose sound like you?

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Inspiration pictures

20

Reference images for a scene, character, place or note. Never sent to an AI.

- [ ] Open the Inspiration tab; describe the scene. Fills a prompt box only; no charge yet.
- [ ] Generate a picture (about $0.03).
- [ ] Upload a JPG, PNG or WebP of your own. Try a GIF too. The GIF is refused.
- [ ] Link a picture to a character; pin it so it shows with them.
- [ ] Edit a picture's title and notes; open it in your image viewer.
- [ ] Delete a picture. It goes to the Trash.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped

Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Writing stats and sprints

21

Personal numbers. They stay on your computer, never in the project.

- [ ] Open session stats from the status bar. Words today, the daily target, the streak.
- [ ] Change the daily word target.
- [ ] Start a short sprint (e.g. 5 minutes), with focus mode. Write until it ends. A summary of words written.
- [ ] Start another and cancel it early.
- [ ] Accept an AI draft. AI words are not counted as your writing.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Atmosphere (sound)

Optional typing sounds and background audio. The app starts silent.

- [ ] Turn on Typing sound from the status bar; type. Try other packs; change the volume.
- [ ] Turn on Ambience; pick a loop.
- [ ] Pick an internet radio station. Add one of your own.
- [ ] Import a sound pack from a zip file.
- [ ] Is there any lag or stutter while typing with sound on?

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped

Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Export

Turn the book into something to read, send or print.

- [ ] Export a typeset PDF book. Check the title page, contents, running heads and page numbers.
- [ ] Export a manuscript PDF (double-spaced, line numbers).
- [ ] Export a plain proof PDF and a Markdown file.
- [ ] DOCX or EPUB (needs pandoc installed; greyed out without it).
- [ ] Export with a pending AI draft in a scene, with and without "include drafts".
- [ ] Parked scenes, comments, scene details and notebook notes are not in the export.
- [ ] Open the file from the app. Export again. A new file; the old one is not overwritten.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped

Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Trash

Deleting never destroys anything until you empty the Trash.

- [ ] Delete a scene, a notebook note and a picture.
- [ ] Open Trash in the binder. All three are listed, each with its kind.
- [ ] Restore each one. They return where they were, with comments and snapshots.
- [ ] Delete the open scene. Another opens; the deleted one does not reappear.
- [ ] Empty the Trash. Asks for confirmation first.

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
Matters to me	◯ Must have ◯ Nice to have ◯ Don't need

WHAT HAPPENED (BUGS, ERRORS, SURPRISES)

HOW IT FELT / WHAT I WOULD CHANGE

Terminal app (optional)

The keyboard-only version, `chisel`, on the same project files.

- [ ] Open the same project in the terminal app. `F1` lists the keys.
- [ ] Command palette with `Ctrl P`; find an action by typing.
- [ ] Edit a scene in the terminal while the desktop app is open on it. The desktop app warns about the conflict; nothing is lost.
- [ ] Scene navigation with `Alt` + arrow keys; spell check with `F6`.
- [ ] Is there anything you would rather do here than in the desktop app?

Function	◯ Works ◯ Rough ◯ Broken ◯ Skipped
Feel	◯ 1 ◯ 2 ◯ 3 ◯ 4 ◯ 5 *1 = frustrating, 5 = a pleasure*
